RE: Letter of Approval to Dispose of PCBs at CSSI Arlington Facility

Dear Mr. Hofer:

On November 21, 1984 Chem-Security Systems, Inc. (CSSI) requested that its Letter of Approval to dispose of PCBs at the Arlington Facility be renewed. Subsequently on July 1, 1985, in response to a March 28, 1985 letter from the Agency, CSSI provided a revised copy of the existing Operation Plan. In our transmittal letter we indicated that a copy of specific documents referred to in the revised Operation Plan would be provided under separate cover.

Accordingly, please find enclosed the following documents:

1. Inspection Plan
2. Waste Analysis Plan
3. Training Plan
4. Contingency Plan
5. Ground Water Monitoring Plan, and
6. Spill Prevention Control and Countermeasure Plan

The Operation Plan refers to a document entitled "Geologic and Hydrogeologic Site Characterization Report, Chem-Security Systems, Inc., Arlington Facility, Arlington, Oregon", dated March 15, 1985; however, since both EPA and the DEQ each have four copies of this document we have not included an additional copy here.

As you may realize, the enclosed documents are frequently revised to reflect changes in system design or operational practices at the Facility. In order to assure that all document holders receive copies of such changes/revisions we have attached a transmittal/control sheet. I would ask that you complete this sheet according to the instructions contained therein.

If for any reason you or your staff should have any question on the enclosed material, please do not hesitate to contact me.

Sincerely,

CHEM-SECURITY SYSTEMS, INC.

Kenneth A. Lepic
Regulatory Affairs Manager
